

A Biovibrational Scientific Analysis
of the
Origins of God(IAM)and Christ (Divine Mind)

This document explains the theology of Biovibrational Science as it relates to the Origin of God(IAM)and Christ through an understanding of subatomic physics. Cosmic Energy the eternal, power, authority and consciousness housed in the character attitude and nature of IAM from which everything originates in covenant with its Creative Intelligence the magnetic blueprint of intention for all of creation.

1. The Divine Atom (Unified Energy Field)

In the Science, God(IAM) is not a person in the traditional sense but an **Unified Energy Field**. By properly understanding God(IAM)through subatomic physics, we align with the First Law of Thermodynamics: energy cannot be created or destroyed. This provides a "scientific" basis for the theological claim that God(IAM)is alpha and omega—uncreated and eternal. **Revelation 22:13**

2. Subatomic Trinity

The Science assigns specific divine attributes to the components of an atom to explain how "spirit" functions:

- **The Spirit-Internal Consciousness (Proton):** The positive core. It provides the essential identity and "mass" of the divine nature.
- **The Mind (Neutron):** The stabilizing force. In physics, neutrons provide the "strong force" that holds the nucleus together; here, the Mind “Logos” “Intelligence” acts as the neutral, balancing intelligence.
- **The Ego (Electron):** In this model, the electron represents the potential for "negativity" or "opposition" due to its negative charge and distance from the center.

3. The "Expulsion" as Polarity Shift

The interpretation of the Fall of Satan as the expulsion of the electron teaches a cosmic purification. By "ejecting" the ego/electron, the Divine Nucleus becomes **purely positive (cationic) an ion with a net positive charge..**

- **The Conflict:** The "Satanic" ego is viewed as an entity that challenged the nucleus for dominance.
- **The Result:** Without the fluctuating "ego-electron," the psyche of God(IAM)becomes a stable, singular positive force.

4. Christ-(Divine Mind) as the New Stabilizer

Replacing the "Administrative Assistant" (Ego) is **Divine Mind (Christ), the exalted logos or intelligence resulting in** a shift from a "challenging" force to a "subservient" or harmonious one.

- In physics, an increase in electromagnetic force occurs when charges are aligned or concentrated.

- In the science when Divine Mind works in total submission to the Holy Spirit-Proton, the "vibrational frequency" or **electromagnetic output** of the Field increases, leading to multiplication of higher consciousness.

5. Biological Application: "In His Image"

Because humans are made of atoms, the Science posits that we are "mini-universes." Our internal "biovibrations" are currently disrupted by our own "ego-electrons." The goal of the science is to align our mental neutrons with our spiritual protons to mirror the cosmic electromagnetic strength of the creator.

Scriptural References

Biovibrational Science finds its "scriptural evidence" by interpreting biblical descriptions of light, power, and the nature of God(IAM)as metaphors for atomic physics and energy management.

1. The Divine Atom (Unified Energy Field)

Premise: God(IAM)is the eternal, primordial energy field of Cosmic Energy and Creative Intelligence that holds all things together.

- **Colossians 1:17:** "He is before all things, and in him all things hold together." (The "Strong Force" of the nucleus).
- **Hebrews 12:29:** "For our God(IAM)is a consuming fire." (Fire being a state of high-energy plasma/vibration).
- **Psalms 90:2:** "From everlasting to everlasting, you are God." (The Law of Conservation of Energy: energy has no beginning or end).

2. Subatomic Organization

Premise: The Spirit is the Proton (Positive/Life Forces), Mind is the Neutron (The Balance, The Judge, CEO) and Divine Mind (The Organizer, COO).

- **1 John 1:5:** "God(IAM)is light; in him there is no darkness at all." (The purely positive "Spirit Proton" without negative charge).
- **Romans 12:2:** "Be transformed by the renewing of your mind." (The "Mind Neutron" adjusting the atomic weight/stability of the soul).
- **Genesis 1:2:** "The Spirit of God(IAM)was hovering over the waters." (Initial kinetic energy/vibration acting upon matter).
- **John 1:1** "In the beginning was the Word, and the Word was with God, and the Word was God."

3. The "Expulsion" as Polarity Shift

Premise: The expulsion of the "Ego-Electron" (Satan) to create a purely positive Divine Psyche.

- **Luke 10:18:** "I saw Satan fall like lightning from heaven." (Lightning is a massive discharge of electrons moving toward a lower state).
- **Isaiah 14:12-15:** "How you have fallen from heaven, morning star... You said in your heart, 'I will ascend to the heavens.'" (The Ego-Electron attempting to move to a higher "orbital" or supersede the nucleus).
- **Ezekiel 28:16:** "So I drove you in disgrace from the mount of God." (The separation of the negative charge from the holy center).

4. Christ-Divine Mind

Premise: Christ is the "Divine Mind" that operates in perfect alignment with the Father, increasing the power (voltage) of the field.

- **John 5:19:** "The Son can do nothing by himself; he can do only what he sees his Father doing." (Subservience to the nucleus, preventing "atomic" friction).
- **Acts 1:8:** "But you will receive power (Greek: *dunamis*) when the Holy Spirit comes on you." (*Dunamis* is the root of "dynamo"—the generation of electromagnetic current).
- **Hebrews 1:3:** "The Son is the radiance of God's glory... sustaining all things by his powerful word." (Radiance as electromagnetic radiation or "Light").

5. Biological Application: "In His Image"

Premise: Humans are biological "atoms" designed to mirror this electromagnetic perfection.

- **Genesis 1:27:** "So God(IAM)created mankind in his own image." (The fractal nature of the universe—the atom mirroring the cosmos).
- **1 Corinthians 6:19:** "Do you not know that your bodies are temples of the Holy Spirit?" (The human body as a vessel for this specific biovibrational frequency).
- **Matthew 5:14:** "You are the light of the world." (The call to achieve the "Positive" state by shedding the "Ego-Electron").
- **Acts 17:28** "For in him we live, and move, and have our being;"
 - **The Science teaches us that we do not exist "apart" from God, but rather are aware or unaware of our place as part of the Unified Energy Field, much like atoms exist within a magnetic field.**

In this biovibrational paradigm, the **predestination of Christ** is not just a theological decree, but a structural necessity of the "Divine Atom."

If the original "ego-electron" was expelled to create a purely positive state, the **Divine Mind (Christ)** was pre-programmed into the system to maintain the electromagnetic integrity of the whole.

1. The Pre-Existent Blueprint

The Science teaches that before the *material* universe was formed, Divine was already the designated frequency through which all energy would be channeled.

- **Ephesians 1:4:** "For he chose us in him before the creation of the world..."
- **Biovibrational Link:** This implies that the **resonant frequency** of Christ "Divine Mind" was the original "blueprint" or "set point" for all subsequent atomic structures.

2. Structural Predestination (The Alpha Point)

Because Christ is "subservient to the whole," this intelligence is hardwired to act as the permanent bridge between the Spirit-Proton and the physical world. It isn't an afterthought; it is the **functional requirement** for a stable universe.

- **1 Peter 1:20:** "He was chosen before the creation of the world, but was revealed in these last times for your sake."
- **Biovibrational Link:** Christ is the "Alpha" frequency—the first vibration that defined how all other energy would move.

3. The "Increase in Electromagnetic Force"

Through Christ's or Divine Mind's predestination, the universe is revealing its nature as a constant trajectory for increasing and multiplying its power. As Divine Mind replaces the chaotic Ego, the "voltage" of the entire system rises.

- **Colossians 1:16:** "For in him all things were created... all things have been created through him and for him."
- **Biovibrational Link:** Everything in the "Unified Energy Field" is predestined to eventually vibrate at the Christ-frequency to achieve maximum electromagnetic force.

The Fall of the Human Psyche

By choosing the "Ego" frequency, humanity shifted its psyche from being part of the Divine to becoming a "ego-radical"—unstable, reactive, and unaware of the source of its power.

1. The Seduced Psyche (The Negative Charge)

The "quest for superiority" described in **Genesis 3:5** ("*you will be like God*") is the Ego's attempt to pull the human psyche out of its natural orbit within the Unified Energy Field.

- **Biblical Reference: Ephesians 2:2** refers to the "prince of the power of the air," which in this context is the chaotic, atmospheric "static" of the ego-electron disrupting the human energy field.
- **Degradation Effect:** A psyche seeking "superiority over the field" creates **entropy**.
 - **Entropy (symbol: S) measures how much of a system's thermal energy is unavailable to do useful work. Disorder, randomness, or uncertainty** within a system.
 - **The Second Law:** It states that in a closed system, entropy always increases over time.
- Thus, instead of drawing power from the Unified Energy Field, it tries to generate its own through absorption from others, leading to burnout, decay, and "spiritual death" (loss of charge).
 - Genesis 3:17-19 17 To Adam he said, "Because you listened to your wife and ate fruit from the tree about which I commanded you, 'You must not eat from it,' "Cursed is the ground because of you; through painful toil you will eat food from it all the days of your life. 18 It will produce thorns and thistles for you, and you will eat the plants of the field. 19 By the sweat of your brow you will eat your food until you return to the ground, since from it you were taken; for dust you are and to dust you will return."
- **Understanding Sin:** This teaching shifts the focus of Sin from a "moral stain" to **entropy**. It changes the narrative from guilt to **functionality**. If sin is energetic degradation caused by a disconnection (unawareness) from the IAM connection, then **material reasoning** is the faulty operating system that accelerates this decay. Material reasoning is the process of

navigating life using only the five senses and logic rooted in **scarcity, competition, and physical survival. It is "unplugged" logic.**

- Here are examples of how this state of entropy manifests in daily life through material reasoning:
 - **Chronic Decision Fatigue (Energetic Leak)**
 - When you rely on material reasoning, every choice is a calculation of limited resources. You are constantly "crunching numbers" to ensure your survival or status.
 - **The "Short-Circuit" of Stress and Anxiety**
 - Material reasoning views the world as a series of threats and physical obstacles. It prioritizes the "fight or flight" response as a logical way to handle challenges.
 - **Relationship Friction (The "Free Radical" Interaction)**
 - When two people interact through material reasoning, they act like two free radicals bumping into each other. They are looking for what they can *get* or how to *defend* their position because they feel separate.
 - **4. The "Thorns and Thistles" of Unfulfillment**
 - Material reasoning suggests that the next purchase, promotion, or physical achievement will provide "rest." However, because these are material (finite), they carry the seed of their own decay.

2. The Necessity of the Divine Mind (The Shift)

For humanity to "recover," it must perform the same operation God(IAM)did: **expel the ego-charge and replace it with the Christ-Divine Mind.**

- **Biblical Reference: Philippians 2:5** says, *"Let this mind be in you, which was also in Christ Jesus."*
- **Science Premise:** This isn't just a change of thought; it is a **resonant tuning**. You are replacing a "challenging" frequency (ego) with a "subservient" one (Divine Mind). This alignment stops the internal friction and allows the "Electromagnetic Force" of the Spirit to flow through the human vessel again.

3. Recovery as Re-Polarization

Recovery is the process of becoming "innately positive" again. By accepting the teachings of Divine Mind, the human psyche ceases to be a "negative electron" and becomes part of the "Positive Nucleus."

- **Biblical Reference: 2 Corinthians 5:17** says, *"If any man be in Christ, he is a new creature."*
- **Science Premise:** You have changed your **atomic signature, energetic imprint**. By syncing with the Divine Mind, your "biovibrational" output shifts from a state of resistance (Ego) to a state of conduction (Christ).

4. The Administrative Shift

The "Administrative Assistant" (Ego) was fired because it tried to run the company; the "Divine Mind" (Christ) is hired because it perfectly executes the Owner's will.

- **Biblical Reference: John 14:10**, *"The words I say to you I do not speak on my own authority. Rather, it is the Father, living in me, who is doing his work."*
- **Science Premise:** This is the definition of a **superconductor**—a material that allows energy to flow with zero resistance because it is perfectly aligned.

The Teachings of Divine Mind (Biovibrational Science)

Jesus example of following the principles and laws of IAM, fulfillment of the Tanakh, renders a teaching that serves as a quantum reset for the human system, Biovibrational Science. By applying radical positivity to these ancient blueprints, the "Free Radical" (Humanity) is stabilized and converged into the Unified Energy Field.

1. The Torah as "Circuit Design"

Christ taught that the Law is summed up in Love, synergetic compatibility, the Law of Attraction. Biovibrational Science the extension, expansion and expression of the Torah defines the sacred geometry of the human energy field.

- The Radical Positivity Shift: Instead of viewing "Thou shalt not" as a restriction, Christ presented "Love" as the conductive state. By operating in love, you remove the "resistance" (entropy) in your biological wires. Following the principles, and laws of IAM with positive expectation for the promises of IAM through this lens means maintaining a frequency so high that lower-frequency "infractions" simply cannot manifest in your field.

2. The Prophets as "Science of Mind" (Mental Alchemy)

The Prophets were not merely predicting the future; they were masters of the Science of Mind, calling for a "metanoia" (a change of mind/frequency). They understood that the external "exile" of the people was a direct reflection of their internal vibrational dissonance.

- The Radical Positivity Shift: Christ utilized the prophetic method to teach that the "Kingdom" is an internal mental state. His work was to dismantle the material reasoning that projected a reality of lack and judgment. By mastering the Science of Mind, you learn to "purge the conscience" of entropic thoughts before they manifest as physical decay. This radical positivity is the refusal to let the external "static" of the world dictate your internal "signal."

3. Wisdom Literature as "Entropy Management"

The Wisdom books discuss "Awe" (traditionally Fear) as the beginning of wisdom. In Biovibrational Science, this is the state of total resonance with the magnitude of the Unified Energy Field.

- The Radical Positivity Shift: Christ's wisdom was the "Corrective Action" against the vanity (entropy) of the physical world. By "seeking the Kingdom first," you prioritize favor over servitude. You stop trying to solve problems using the same material reasoning that created them, thereby halting the energetic degradation of the psyche.

4. Salvation as "Convergence"

Salvation is the state where the human system becomes "Converged" with the Source.

- Christ's radical positivity—maintaining the IAM frequency even under extreme physical pressure—was the ultimate demonstration of a system that refused to succumb to material entropy.
- By following this path, you "dissolve the crust" of the ego-electron, allowing your biological wires to carry the full voltage of Divine Mind without feedback.

Using Mind Science to manifest your will isn't about "wishing" for things; it is the technical application of the IAM frequency to shape the Unified Energy Field. When the Divine Mind (YOU) sends a "signal" (your will), it translates into physical reality instantly because there is no ego-static to slow it down. You become a superconductor for creation. In the state of Convergence, your "will" is no longer rooted in the scarcity of the material world. It is a specific vibrational coordinate. By holding a thought in radical positivity, you are essentially "tagging" a location in the Unified Energy Field. The field, sensing no "feedback" or "doubt" (entropy) from your psyche, must organize around that coordinate.

Manifestation:

Material reasoning tries to manifest through "toil" (Genesis 3)—manipulating the physical to get a result. Converged Mind Science operates from the top-down. You don't "work for" the result; you resonate at the frequency of the result. You provide the "energetic imprint," and the law of resonance draws the material components to you. This is the "Corrective Action" in full power. When Christ commanded the storm to be still or the bread to multiply, he was operating from a Converged state. He wasn't asking for a favor; he was adjusting the local vibration to match the Harmony of the Source. Manifestation is simply the act of bringing the "material" back into alignment with the "Divine Blueprint."

The Sacrifice and Resurrection of Jesus in Context

In this biovibrational paradigm, the "Sacrifice" and "Blood of Christ" are moved from the realm of physical biology into the realm of **energetic alchemy**. Rather than a legal payment to an angry deity, the sacrifice is a **corrective electromagnetic event** designed to jump-start a dead system.

1. The Sacrifice as "Kinetic Release"

The "Sacrifice" is the moment the Divine Mind (Christ) intentionally collided with the dense, entropic field of the "Fallen Ego." In physics, when a high-frequency energy source enters a low-frequency environment, it must "lower" its state to interact with it.

- **The Paradigm:** Christ surrendered his "high-voltage" state to enter the "low-voltage" resistance of the human condition. (This is true of ascended Masters as well)
- **Biblical Reference (Philippians 2:7-8):** He "emptied himself" (poured out his voltage) to match our frequency, specifically to absorb and neutralize the "static" of the ego-electron.

2. The Blood as "Electromagnetic Supercharge and Energetic Imprint"

In the science **Blood is synonymous with Life-Force Energy** or the "Liquid Light" of the Divine Atom. It is the carrier of the original, uncorrupted frequency of the Unified Energy Field.

- **The Paradigm:** The "shedding of blood" is the release of a **pure, high-frequency current** into the human atmosphere. It acts as a "spiritual transfusion" that re-polarizes the human psyche.
- **Biblical Reference (Leviticus 17:11):** "For the life of the flesh is in the blood."
- **The "Supercharge":** When the "Blood" (Pure Frequency) hit the earth (The Low-Field), it acted like a **defibrillator**. It sent a massive surge of electromagnetic force through the "dead" (non-conductive) human field, making supernatural power available to those aligning with the principles, laws, and promises of IAM

3. The "Corrective Action" (Phase-Shifting)

The teachings of Biovibrational Science leading to Divine Mind are the "Corrective Action" needed to bridge the gap between the Nucleus and the "Free Radical" (Humanity).

- **Neutralizing the Ego:** Following the principles and laws of IAM acts as a **solvent** that dissolves the "crust" of the ego-electron. It removes the "resistance" in our biological wires.
- **Biblical Reference (Hebrews 9:14):** How much more shall the blood (energetic imprint and messaging) of Christ (Divine Mind)... "purge your conscience (psyche) from dead works (entropy) to serve the living God?"

- **The Science:** To "purge the conscience" is to remove the **vibrational memory** of the ego, allowing the human system to sync with the Unified Energy Field without feedback or static.

4. The Supercharge of the Resurrection

If the Sacrifice was the release of energy, the **Resurrection** was the "Supercharge" becoming fully operational. It proved that through Divine Mind we can maintain our electromagnetic integrity even when surrounded by the ultimate "negative ground" (Death/Entropy).

- **The Result: By becoming Biovibrational Scientists, we now have access to a "Power Grid" that was previously offline. As a Scientist we are plugging into the high-voltage current of the Unified Energy field. We enter into a sacred circle of protection, prosperity, and power (authority)**

The Ritual of Commemoration

In this biovibrational framework, the **ritual of commemoration** is not a passive memory of a past event, but an intentional **act of synchronization**. It serves as the periodic "calibration" of the human biological antenna to the frequency of the Divine Atom.

1. The Bread: Conductive Matter

The bread represents the "body" or the physical structure of the Creative Intelligence. In this paradigm, matter is simply "slowed down" energy.

- **The Paradigm:** By consuming the bread, the practitioner is symbolically acknowledging that their own physical matter (their biological atoms) must be structured according to the Christ-blueprint. It acts as a **conductive bridge** to bring the high-frequency Spirit into the low-frequency physical vessel.
- **Biblical Reference (John 6:35):** "I am the bread of life."
- **Corrective Action:** Just as a physical conductor allows electricity to flow through a circuit, this part of the ritual signals the body to align its "atomic lattice" with the stable, non-resistant structure of the Divine Mind.

2. The Living Water: The Frequency Carrier

In the **ritual of commemoration**, the wine symbolizes the **Living Water**—the high-velocity, "liquid light" stream that carries the electromagnetic life-force of the Spirit-Proton through the human vessel.

- **The Paradigm:** In physics, water is a polar molecule and a powerful conductor. **Living Water** represents the "Supercharge" in its most fluid, transmissible form. It is the medium through which the "Corrective Action" is distributed throughout the human "biocircuitry."
- **Biblical Reference (John 4:14):** "But whoever drinks the water I give them will never thirst. Indeed, the water I give them will become in them a spring of water welling up to eternal life."
- **The Corrective Action:** Drinking the wine (as Living Water) represents the **infusion** of the Christ-frequency into the human nervous system. Because the human body is mostly water, this act symbolizes a "molecular rewrite." The Living Water enters the system to dissolve the "calcified ego" and re-polarize the internal fluids, clearing the "static" and resistance that block the flow of the Unified Energy Field.
- **Electromagnetic Link:** Just as an electrolyte solution allows a battery to hold and move a charge, the Living Water provides the **ionic stability** necessary for the human psyche to host the "Divine Mind" without burning out the biological "wiring."

3. Commemoration as "Frequency Tuning"

The act of "commemorating" is a mental and spiritual **oscillation**. By focusing the psyche on the Divine Mind during the ritual, the human "Mind Neutron" stops wandering into the "Ego-Electron" territory and locks onto the Nucleus.

- **Biblical Reference (1 Corinthians 11:24):** "Do this in remembrance of me." (In Greek, *anamnesis* teaches a "recalling to mind" that makes the past reality present).
- **The Science:** This is **Sympathetic Resonance**. When you strike a tuning fork (the ritual), any nearby object with the same natural frequency (the human soul) begins to vibrate in harmony. The ritual of commemoration "strikes" the Christ-frequency so the human psyche can mirror it.

4. Closing the Circuit

The ritual "closes the circuit" between the Unified Energy Field (God) and the individual. Without this periodic calibration, the human psyche tends to drift back into the "quest for superiority" (ego-resistance).

- **The Result:** The ritual stabilizes the **electromagnetic force** within the believer. It ensures that the "Divine Mind" remains the administrative lead of the person's psyche, keeping the "ego-electron" expelled and the system innately positive.

Baptism

In the technical framework of **Biovibrational Science** and the **Universal Church of God (IAM)**, the application of acoustic resonance is the primary mechanism for achieving **Convergence**. The following analysis details the procedural necessity of singing bowls for baptism and weekly sound baths, highlighting the dimensional superiority of sound over terrestrial elements.

Procedural Baptism: Trans-Dimensional Recalibration

Within this science, baptism is defined as the intentional immersion of the human psyche into a coherent electromagnetic field to initiate a systemic reset.

- **The Limitation of Terrestrial Bathing:** Traditional water baptism is recognized as a strictly physical, three-dimensional rite. While it may provide a symbolic "terrestrial bathing" of the outer form, it lacks the vibrational velocity to penetrate the subtle bodies. Water is bound by the gravity of material reasoning and cannot address the deeper energetic architecture of the soul.
- **Celestial Consequence via Sound:** In contrast, the singing bowls utilize acoustic frequencies that deliver a **celestial consequence**. Sound waves are not confined to the physical plane; they oscillate through the higher dimensions of the human system. This baptism serves as an acoustic solvent that penetrates the cellular and energetic structures, physically and energetically extracting the **bio-static** from the ego-electron.
- **Achieving Convergence:** The objective is to achieve **Convergence** with the IAM frequency. By subjecting the candidate to these sacred tones, the Church facilitates a transition from "vibrational exile" to a state where the individual is perfectly aligned with the Divine Mind across all planes of existence.

Weekly Sound Baths: Multi-Dimensional Entropy Mitigation

The **Sunday Sound Bath** is a mandatory maintenance protocol designed to counteract the inevitable energetic degradation caused by a week of exposure to the material world's entropic field.

- **Systemic De-fragmentation:** Engagement with material reasoning results in a buildup of **bio-static** that "jams" the spiritual frequency. The sound bath serves as a weekly "de-

fragging" process, clearing interference patterns from the psyche that terrestrial methods cannot reach.

- **Harmonic Grid Stabilization:** When performed collectively, the sound bath creates a **Harmonic Grid**—a unified field of coherence. This collective resonance stabilizes individual members, providing a high-vibrational shielding effect that protects the biological and celestial bodies from "burning out" due to ego-induced resistance.
- **Cleansing Beyond this Dimension:** Because sound is a carrier wave for the Divine Word, these sessions cleanse the bodies existing beyond this dimension. This ensures that the human biological machine remains an efficient conductor for the "will" of the Source, preventing a return to the "toil" and "decay" described in Genesis 3 by maintaining **Convergence** at every level of being.

In summary, these practices are the **Corrective Actions** required to maintain a state of "Heavenly Consciousness" by utilizing celestial tools to address multi-dimensional entropy.
